RE: Letter of Support for Tesla's Colorado Plazas DCFC Application

Dear Colorado Energy Office,

The Town of Castle Rock, Colorado offers this letter of support for Tesla's Colorado Energy Office (CEO) Direct Current Fast Charging (DCFC) Plazas Application which proposes a 16-stall DCFC Tesla Supercharger site in Castle Rock. The location of the proposed site is 4612 Milestone Lane in Castle Rock – near the intersection of Founders Parkway and Front Street. The site is situated near Interstate 25 and is in the parking lot of the Milestone Crossing shopping area. Tesla has submitted a preapplication for this project and is currently working through project approvals. The proposed Tesla site will provide additional options in charging infrastructure to both residents and travelers passing through our town.

Tesla's proposed sites will have added benefits of (1) promoting local and regional EV options; (2) providing additional fueling infrastructure for those with electric vehicles; (3) generating economic benefits for our local businesses by attracting new local and traveling customers; (4) reducing local air pollution and greenhouse gas emissions; and (5) supporting meeting the state of Colorado's EV charging goals.

Because of the benefits described above, and assuming Tesla gains all necessary project approvals, the Town is supportive of the proposed Tesla Supercharger site in Castle Rock.

Sincerely,

Jason Gray
Mayor
