- 4. Based on past projects of this size/type we see on average xx RFI's. Understanding that 10% of these submittals might be handled by the Owner's Rep. we have anticipated X RFI's
- 5. Anticipate approximately X design revision drawings/sketches
- 6. Review of Change Orders for scope of design work only. A detailed review of subcontractor pricing not anticipated by design team.
- 7. The general intent is to attend Owner/Architect/Contractor meetings on site every other week, an allowance of site visits has been established so that these can be scheduled as needed if a irregular site visit cadence is needed.
- 8. Site observation reports will include identifying general weather conditions, general activities in progress on site, and any potential deficiencies not in alignment with the contract documents.
- 9. We anticipate any pre-construction meeting of mockup review can be coordinated with regular job site OAC meetings. We have anticipated a few additional visits may be required outside of the regularly scheduled meeting day.
- 10. Exhaustive Punch List walks are not anticipated and we assume Owners' Rep/Owner will handle any pre-walk or review of completion prior to Design Team Punch walk
- 11. Some early submittals, substitution requests as well and early sub-contractor coordination may occur prior to the completion of the Construction Documents phase.
