

Planned Development Zoning

An illustration of the names and boundaries of all Planned Developments and Amendments. There is no significance represented by the colors used except to delineate boundaries. Numbers in table do not represent chronological order of Planned Development approvals. There are two types of zoning mapped within the Town: Standard Zoning districts and Planned Development (PD) districts. Standard Zoning consists of a series of pre-established districts. The criteria for these zones districts (permitted uses, setback requirements, and maximum building heights) remain the same, no matter where the zone is located. Standard Zoning is an historic approach to land use management and is still in effect for the core of Town, which refers to the older downtown area and nearby residential areas. Each Planned Development district is unique and relates to a development plan that was prepared specifically for that property (typically large properties). All Planned Development districts are subject to the same zoning code that was adopted by the Town and are subject to the same zoning requirements, specific to either Standard or PD zoning districts, refer to title 17 of the Town of Castle Rock Municipal Code.
