

We got WISE

9 years of planning
13 regional partners
\$50 million in infrastructure

Come celebrate a major milestone in securing water for our future! Join us from 4:30-6:30 p.m. Friday, June 8, at Gemstone Park, 6145 Sapphire Point Blvd., for food, fun and festivities!

In 2009, Castle Rock Water became part of the Water Infrastructure and Supply Efficiency (WISE) Partnership with 10 South Metro organizations to import renewable water from Denver and Aurora. Sharing the costs and resources of more than 60 miles of pipes, a new water treatment plant and storage tank, renewable water is now being imported, ensuring a strong water future for Castle Rock.
