

Chapter 17.28 - Business/Commercial/Industrial Districts

17.28.010 - Description and purpose.

- A. Business/Commercial (B). The primary use within the B District is intended to allow for appropriately located groups of retail stores, office buildings, service establishments and civic uses serving the needs of the neighborhood, of such character, scale, appearance, and intensity to be compatible with the surrounding areas.
- B. Light Industrial (I-1). The I-1 District is intended to allow industrial development with minimal impact to residential and commercial areas. Such zones will require setbacks and landscaping to ensure compatibility with any abutting residential areas. The regulations of this District are intended to provide structural standards, standards of intensity of use and standards of external effects compatible with the surrounding or abutting residential districts. To these ends, development is limited to low intensity, external effects are limited and permitted uses are limited to those manufacturing and wholesaling activities which can be operated in a clean and quiet manner.
- C. General Industrial (I-2). The I-2 District is intended to allow a less restrictive type of industrial development where the necessary characteristics of industrial operation will not adversely affect nearby residential and business uses. The purpose of the District is to permit the normal operation of almost all industries, subject to those regulations necessary for mutual protection of nearby property owners in the lawful use of their respective properties, and the public health, safety and general welfare.
