Subject: Oct 2 Town Council Meeting, request to be on Ageda

Dave,

In relation to the Crystal Valley Interchange & W Frontage Road, we believe time is of the essence and would like to support any and all efforts to help this project move forward successfully. We are aware that a Feasibility Study is potentially in the works. In looking at the successes of the I-25 GAP project in moving quickly and finding funding, we believe it would be helpful to utilize the same strategy here. We request that as part of Tuesdays October 2's Agenda we discuss creating a Formal "Crystal Valley Interchange Coalition" that can work as partners in this endeavor of the feasibility study and moving forward. As part of this Coalition and feasibility study the four key criteria would be:

1. Project parameters
2. Cost
3. Time Frame
4. Funding Structure

Thank you for your time and consideration with this project. Please call me if you have any questions.

Thanks,

Gregg Miller
