Subject: Proposed 4 story in Meadows

I am writing you to oppose The Meadows town center building a 60' 4-story mixed use building with 4,800 sq' of restaurant space in the ground floor and 111 apartment units on stories 2-4. I am part of the Meadows Next door forum and the comments posted in there by Castle Rock homeowners overwhelmingly oppose this development as it is currently proposed. I strongly encourage you as town officials to do additional research among the Castle Rock property owners before voting to allow this project to begin. The opinion of current residents should be key to your decision making regarding this proposal. One of your planning commissioners, Richelle McKim, is well-versed on our views. I hope you will reach out to her for additional information about our opinions.

Subject: Too much development and building

I'm writing to voice my concern at the lack of interest the planning commission shows when deciding on new structures, buildings, houses, apartments and condominiums. I was just informed of another new development that is set to be built in the Meadows Neighborhood. This particular structure is described as follows."On the agenda for Thursday is a proposal for The Meadows town center to build a 60' 4-story mixed use building with 4,800 sq' of restaurant space in the ground floor and 111 apartment units on stories 2-4. "

There is not one single resident I talk to in any of my activities around town that feels our town is going on the right direction with development at this point. It appears as if the city council and planning commission is not listening to their constituents and are in the pockets of developers. While that may not be true in actuality that is the appearance.

I think it is time to quit approving any new development until all existing development is complete and we have time to see how it affects our town and out infrastructure.

As we all drive around town nearly every restaurant and store has help wanted signs in their windows. The costs of living here are going up quite rapidly and businesses cannot seem to retain reliable help. The quality of service has dropped as well as the quality of food in the restaurants because of the lack of people to have a full staff.

It's time to have a building moratorium until we can evaluate the pros and cons for our town. It's sad to see how much our quaint town has changed in the last 10 years and how bad traffic and crowds have gotten.

I urge you to not approve this development nor any future development until impact studies can be done on the effects on our infrastructure and water issues.

Respectfully,

Laura Zumwalt

Meadows neighborhood

Subject: Input regarding current and future development in Castle Rock

Thank you for reaching out in a forum like this. It is refreshing to be engaged for input and this should be the norm. It is my opinion that we have lost our way as a municipality when it comes to planning. The Outlet mall area development is not what we were sold. We had an opportunity to create something that added value to the community and could have been a heartbeat type development. Instead we have wholesale development that requires a car to navigate from store to store. We have vacancies all over the place in retail centers because we do not have enough workers to staff service establishments. We have restaurants that close early or go out of business because of the challenges associated with hiring reliable employee resources. At this point in time we do not need further retail or office space development. We need a coordinated approach toward ensuring that we have an ability to support a diverse set of employment and income demographics so that we are able to cultivate and sustain a thriving community. We do not have that at this point. The character of our community is suffering because we have made mass development the priority over quality of life. Please do your best to change course.
