Section 7. Amendment. The definition of “water budget” in Section 13.12.111 of the Castle Rock Municipal Code is amended to read as follows:

13.12.111 - Definitions.

As used in this Chapter, certain terms are defined as follows:

Water budget shall mean tailored water use allocations developed for each customer with rates that increase as the allocation is exceeded.

1. Water budget base rates shall be established to:
 - a. Identify customer-specific monthly budgeted amounts of water that vary by landscaped area, landscape type, and monthly historical evapotranspiration (ET); and
 - b. Charge volume rates per unit of water use that vary by consumption tier.
2. A monthly water budget FOR RESIDENTIAL CUSTOMERS is equal to the AWMC and the calculated amount of water allocated to a customer based on that customer's landscaped area in square feet determined by the Town and eighty (80) percent of the monthly required watering needs for the landscape type per square foot of landscaped area based on the historical evapotranspiration rate in accordance with Castle Rock Water procedures. For single-family customers, the landscaped area is subject to an irrigated area cap of seven thousand (7,000) square feet for calculation of the water budget. The monthly irrigation requirements for the landscape type vary throughout the year; therefore, the monthly budgets will vary while the landscaped area is held constant. Customers are billed for the amount of water used each month in comparison to the monthly water budget. If a customer's

water use exceeds the monthly budget, the amount billed per one thousand (1,000) gallons of water used increases for the amount over the budget.

3. The water budget-based thresholds define the tiers of consumption for calculating an individual customer's monthly bill. The threshold represents the maximum usage in each consumption tier for which a customer will be billed a specific rate per one thousand (1,000) gallons of use.
4. For all customers with irrigation, excluding irrigation-only customers, there are two (2) tier thresholds during the irrigation season: the AWMC and the monthly irrigation budget. There are three (3) consumption tiers for these customers: AWMC, budget and excess as defined in this Section. During the winter season, there is one (1) tier threshold, the AWMC; there are two (2) consumption tiers, AWMC and excess.
5. For all customers: With indoor use only, there is one (1) tier threshold during both irrigation and winter seasons: AWMC. There are two (2) consumption tiers for these customers: AWMC and excess.
6. Irrigation-only customers are subject to one (1) tier threshold during the irrigation season, which is the individual monthly irrigation budget. Irrigation customers are subject to two (2) consumption tiers during the irrigation season: budget and excess. During the winter season, there is one (1) consumption tier excess.

Section 8. Amendment. The Renewable Water Service Charge table in Section 13.12.112 of the Castle Rock Municipal Code is amended to read as follows:

13.12.112 - Service charges, all users, excluding bulk.

Section 10. Severability. If any part or provision of this Ordinance or the application thereof to any person or circumstances is held invalid, such invalidity shall not affect other provisions or applications of this Ordinance which can be given effect without the invalid provisions or application, and to this end the provisions of this Ordinance are declared to be severable.
