Design Review Board Approval

THIS SITE DEVELOPMENT PLAN AMENDMENT WAS APPROVED BY THE DESIGN REVIEW BOARD OF THE TOWN OF CASTLE ROCK, COLORADO, ON THE _____ DAY OF _____, 20____.

CHAIR _____ DATE _____
ATTEST: _____

DIRECTOR OF DEVELOPMENT SERVICES _____ DATE _____

Site Development Plan

General Notes:

1. Approval of this Site Development Plan does not constitute approval of any deviations from Town of Castle Rock regulations and standards. All deviations from Town regulations and standards are subject to the appropriate procedures for approval. There may be subsequent amendments.

2. This site is zoned B - Business Commercial.

3. Retaining walls in common areas or that span multiple lots regardless of size/height must be located in a tract. The retaining walls must be maintained by the HOA or Metro District.

4. The Town of Castle Rock requires that maintenance access be provided to all storm drainage facilities to assure continuous operational capability of the system. The Property Owner, subsequent owners, heirs, successors and assigns shall be responsible for the maintenance of all drainage facilities including but not limited to: inlets, pipes, culverts, channels, ditches, hydraulic structures, and detention basins located on this property, unless modified by the Subdivision Improvements Agreement. Should the Owner fail to adequately maintain said facilities, the Town shall have the right to enter said property for the purposes of operation and maintenance. All such maintenance costs will be assessed to the Property Owner, subsequent owners, heirs, successors and assigns. The maintenance costs shall include all actual costs for labor, equipment and materials and a 25% fee.

5. Pursuant to the Town of Castle Rock Landscape Regulations the Property Owner, subsequent owners, heirs, successors and assigns shall be responsible for the proper maintenance of the area subject to the approved Site Development Plan. Landscaping within public rights-of-way is to be maintained by the adjacent private property owner or the Homeowner/Property Owner Association, as applicable. Landscaping shall be continuously maintained including necessary watering, weeding, pruning, mowing, pest control, and replacement of dead or diseased plant material. Upon written notice by the Town, the Owner will have 45 days to cure or replace damaged or dead landscape material. In the case of diseased landscape material, a shorter compliance period may be specified in said notice. The Town of Castle Rock Water Conservation Ordinance regulates times of seasonal irrigation and prohibits the wasting of potable water through improper irrigation.

6. Final landscape area, coverage and plant quantities, shall meet or exceed quantities represented in this Site Development Plan. Any changes to the approved landscape plans shall require an SDP amendment.

7. The number of parking spaces are based on the proposed uses on this Site Development Plan. A change of use to a more parking intensive use as identified in Chapter 17.54 of the Castle Rock Municipal Code or applicable Planned Development Zoning will require an amendment to this Site Development Plan.

8. A sign permit for each sign must be obtained from the Town of Castle Rock Zoning Division prior to placing any sign on the property. All signs must comply with the provisions of Title 14 (Sign Code Regulations) of the Municipal Code or applicable Planned Development Zoning regulations.

9. Any street signs, striping, street lights and curb ramps are conceptual only and subject to Town review with the Construction Documents. These items shall comply with the Town of Castle Rock's regulations, standards and requirements.

10. The Developer shall conform to the Town of Castle Rock Water Use Management Program Implementation Policy, as amended from time to time, for this project.

11. No solid object (excluding fire hydrants, traffic control devices and traffic signs) exceeding thirty (30) inches in height above the flow line elevations of the adjacent street, including but not limited to buildings, utility cabinets, walls, fences, landscape plantings, crops, cut slopes, and berms shall be placed within sight distance lines and sight distance easements.

12. All proposed Utility, Drainage, Emergency Access, Sight Distance and Public Access/Trail Easements as shown on the Site Development Plan are conceptual and shall be established with a plot or separate document.

13. Unless otherwise noted, all lots shall have a 10-foot Utility Easement along the front and rear lot lines and along all public rights-of-way and shall have 5-foot Utility Easements along each side lot line. These Utility Easements are for the installation, maintenance and operation of utilities and drainage facilities including, but not limited to street lights, electric lines, gas lines, cable television lines, fiber optic lines and telephone lines, water meters, fire hydrants and curb boxes as well as perpetual right for ingress and egress for installation, maintenance and replacement of such lines. Any variation from this requires an approved Technical Criteria Variance.

14. All subdivisions shall include adequate easements to accommodate the construction, maintenance and repair of all public access, sidewalks, trails, water supply system, waste water systems, storm water management system and erosion control facilities, telecommunications and other utilities required to provide each utility to each occupied structure in the subdivision.

15. No structure shall be constructed over any portions of a recorded Town easement unless a revocable license is approved by the Town and the structure will not interfere with the intended use of the easement.

16. Any structures placed in the easement including but not limited to parking, fencing, retaining walls and landscaping shall be removed and replaced by the owner upon the request of the utilities department or private utility company so that maintenance may be performed. The owner of the land shall agree to hold the Town and/or private utility company harmless for any loss of property or landscaping and irrigation removed from the easement or damaged due to maintenance activities and all associated costs.
