- A. The protection and preservation of the Town's historic and cultural heritage, as embodied in designated Historic Landmarks and Historic Downtown Area, by appropriate regulations;
- B. The enhancement of property values and the stabilization of historic neighborhoods and commercial areas;
- C. The increase of economic and financial benefits derived from tourists, visitors, homebuyers, businesses and developers; and
- D. The provision of educational opportunities to increase public appreciation of the Town's unique heritage.

The intent of this Chapter is to create a method to draw a reasonable balance between private property rights and the public interest in preserving the Town's unique historic character.

15.64.020 Definitions.

Adjacent Property means a property that shares a property line in part or is separated by a street right-of-way or alley-way.

Alteration means any change, addition or modification of any portion of the exterior of a building or designated feature which is visible from a public street or any other public place. Such features include, but are not limited to, the color, kind and texture of building materials, and type, design and character of windows, door and appurtenances.

Alteration Certificate is a written authorization, which must be issued by the Historic Preservation Board prior to any Alteration to an Historic Landmark.

Castle Rock Design is the Town's design guidelines that encourage design quality that is in harmony with the Town's character. The Town Council adopted the document on May 12, 2003 by Resolution No. 2003-64.

Colorado Cultural Resource Survey is the collection and analysis of information concerning the physical remains that represent the Town's past. The information characterizes both the resources and their location and becomes the basis for evaluation. A survey documents the physical evidence of the past that expresses and contributes to the history of a region.

Compatible means likeness or similarity in character. This may include a similarity or likeness in a building form, envelope, footprint, roof, window or door patterns and/or materials of a building.

Contributing Structure is a property, such as a house, barn, depot, commercial building, church or similar construction or bridge, roadway, grain elevator or railroad, that is deemed significant because of its importance to a particular area or the Historic Downtown Area as a whole. A structure deemed Contributing may or may not be eligible for a local Landmark designation, but Historic Integrity is a key aspect of a Contributing Structure.

Craig and Gould is a neighborhood located within the Historic Downtown Area. The neighborhood is bounded by Front Street to the west, Gilbert Street to the east, Rock Park to the north, and South Street to the south (see Figure 1 below).

Figure 1
Craig and Gould Neighborhood

Demolition means razing, destroying, dismantling, defacing or in any other manner causing partial or total ruin of a structure.

Demolition Certificate is a written authorization, which must be issued by the Town Council prior to any Demolition within the Historic Downtown Area.

Department means the Town of Castle Rock Development Services Department.

Economic Hardship means facts and circumstances which establish that there are no feasible measures that can be taken which will enable the property owner to make a reasonable beneficial use of the property or derive a reasonable economic return from the property in its current form.

Historic Context is a compilation of information about historic properties that share a common theme, character, geographic area and time period.

Historic District or *District* is a formally recognized area where all Contributing Structures are treated as designated landmarks. Historic District boundaries will be defined by visual changes, historical documentation of different associations or patterns of development, or evidence of changes in site type or site density as established through testing or survey. The Significance of a Historic District may be recognized through listing in a local, state or national landmarks register.

The *Historic Downtown Area* is determined to be an area of general historic Significance to the Town in need of particular review for Demolitions that may impact the architectural heritage of the Town. The Historic Downtown Area is defined as that area depicted on the map as shown in Figure 2 below.

Figure 2
Historic Downtown Area

Historic Integrity is the ability of a property to convey its Significance, or the authenticity of a property's historic identity, evidenced by the survival of physical characteristics that existed during the property's prehistoric or historic period. Integrity is judged based on the following seven aspects as defined by the National Park Service and Colorado Historical Society: location, design, setting, materials, workmanship, feeling and association.

Historic Landmark or *Landmark* means an individual structure, object, feature or area which has been designated by ordinance on the Town's Register of Historic Places because of its historic Significance and importance to the Town. *Landmarks* may also include sites which were the scene of an activity which has historic Significance to the Town, such as parks, abandoned quarries, agricultural sites or significant geologic features which played an important role in the Town's history.

Historic Preservation Plan is a document that serves as a policy guide for all other Town-wide plans and decisions as they relate to identified historic resources. The Plan was adopted by the Town Council by Resolution No. 2007-72 on June 12, 2007.

Historic Property means any property that is designated as a local Historic Landmark by ordinance, or is listed on the State or national register, or is listed as a property deemed eligible for local landmarking according to the Castle Rock Historic Survey.

Minor Alteration means the change of a single feature (i.e., door, porch feature, window, accessory structure, paint) or the replacement or repair of a feature that does not dramatically change the visual appearance of the structure.

Reconnaissance Survey provides basic information on a property, including but not limited to the construction date, a brief history, pictures of all elevations and a site map.

Rehabilitation is defined as the act or process of making possible a Compatible use for property through repair and/or Alterations while preserving those portions or features which convey its historical, cultural or architectural values.

Relocation Certificate is a written authorization, which must be issued by the Historic Preservation Board prior to any relocation of an Historic Landmark.

Restoration is defined as the act or process of accurately depicting the forms, features and character of a property as they appeared at a particular period of time by means of the removal of features from other periods in its history and reconstruction of missing features from the restoration period. The limited and sensitive upgrading of mechanical, electrical and planning systems and other code-required work to make properties functional is appropriate within a restoration period.

Sense of Place is defined as a place that has certain characteristics that make it special; this may include its architecture, geographic features, building types, uses or Historic Context.

Significance is the aspect of history that determines why a property is important to the Town. Generally, this can be the setting, cultural significance, architecture or association with a significant person or significant event. A property may meet the criteria under more than one area of Significance.

Site is the location of a significant event, a prehistoric or historical occupation or activity, or a structure, whether standing ruined or vanished, where the location itself possesses historical, cultural or archaeological value regardless of the value of any existing structure. Examples of *Sites* may include a mesa, butte, rhyolite quarry, local ranch, railroad stop or archaeological site of historic importance to the Town.

Structures of Historic Significance means non-Landmarked structures, such as a house, barn, depot, commercial building, church or similar construction or bridge, roadway, grain elevator or railroad, which are listed as eligible for local or national register nomination on a Colorado Resource Survey.
