### Description

1" solid aluminum rod sculpture drawn in 3-dimensions using a 2-dimensional drawing of a golden rectangle open box. Painted with an automobile finish coating. The sculpture is 86" high 67" wide 10" deep.

### Title

Open Box Open Mind

### Sale Price

\$5000

### Weight

70 pounds

### Dimensions

86" high 67" wide 10" deep

### Is a base included with your sculpture?&nbsp;

yes

### If there's a base, what are the dimensions for the sculpture with the base (width x height x depth)? What's the weight in pounds?

To be produced at the site - see below

### Medium (Note: for mixed media, all materials must be able to withstand Colorado outdoor weather conditions.)

1" solid aluminum rod

### Year created

2007

### If this is a multiple, please provide the edition size and number of piece, serial number (if applicable), and other locations

### this piece has been shown. Say "N/A" if not applicable.&nbsp;

N/A

### What equipment and supplies are required to install this piece? Please include any unusual basing and/or anchoring requirements.

Easily bolted on to a 6" wide x 4" thick x 48" long poured concrete slab below ground covered with grass. It would be very helpful to have a small crew of two besides myself who will help prepare a 12" below ground concrete slab built with studs to hold the sculpture securely in place.

### Please explain how this piece should be maintained throughout the year and what cleaning supplies should be used.&nbsp;

None required

### How did you hear about the Douglas County Art Encounters?

### Description

This is a grizzly bear sculpture made from scrap metal.

### Title

The Grizz

### Sale Price

\$50,000

### Weight

1,500lbs

### Dimensions

H-49" x W-43" x L-96"

### Is a base included with your sculpture?&nbsp;

no

### If there's a base, what are the dimensions for the sculpture with the base (width x height x depth)? What's the weight in pounds?

No base.

### Medium (Note: for mixed media, all materials must be able to withstand Colorado outdoor weather conditions.)

Metal

### Year created

2021-2023

### If this is a multiple, please provide the edition size and number of piece, serial number (if applicable), and other locations this piece has been shown. Say "N/A" if not applicable.&nbsp;

N/A

### What equipment and supplies are required to install this piece? Please include any unusual basing and/or anchoring requirements.

Crane/forklift to physically place sculpture to desired location. This sculpture can be welded down to a steel base or bolted down to concrete. If thief is not an issue, it can simply sit there. It is heavy enough that it will be difficult to move without planned effort and it will not tip over.

### Please explain how this piece should be maintained throughout the year and what cleaning supplies should be used.&nbsp;

No maintenance or cleaning needed. Rust will begin over time but that is intentional to achieve the natural color of the grizzly bear. Although it will rust in coloration, it will not rot away because there are no spots for sitting water.

## Janene DiRico-Cable (Continued)

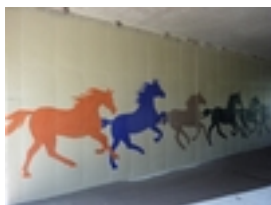

"Slice of Life" started life in downtown Castle Rock, CO as a historic cottonwood tree. As the tree was being removed, I stopped to barter with the maintenance workers= homemade cookies in exchange for the slices of wood. "Slice of Life" was reborn! Made to live outside to weather the storms or sheltered inside, "Slice of Life" has the history of Castle Rock in every growth ring (about 120-150 years) and has many more years to enchant the public. (The wood will gray naturally but has been treated with wood preservative)

#### Art Detail

##### Category

**Statement** The environment of Colorado and the Southwest significantly influences my work. I draw from the energy of the mountains, sky, weather, plains, grasslands, rivers, wetlands and our urban environments. My sculptures represent the energy found in totems and the interaction of the positive and negative spaces created by the sculpture's shapes. These represent moments in time depicted in a static state.

In the last eight years I have designed, constructed, installed more than 86 public art sculptures. All sculptures completed are designed for extreme weather conditions by utilizing steel - powder coated, chromed, rusted or high fire salt components. Additionally, all sculptures are designed with virtually no maintenance requirements, public safety and ease of graffiti abatement have been incorporated into each sculpture. My sculpture is positive and reaches out to folks to encourage exploration of thoughts, positive affirmations and general well-being.

## Custom Answers

### Description

The piece GROW Portal contains an optical illusion. When the viewer is very close to the piece they can see the details of the scene, mushrooms, grasses, insects, soil, etc. When the viewer is further away from the piece all of the visual elements combine to form the word "GROW." Even though many viewers are convinced that some mechanical or technological element is creating the illusion the entire process occurs completely through effective design of the image. You have to see it to believe it.

### Title

GROW Portal

### Sale Price

3000

### Weight

30 lbs

### Dimensions

10' h x 3' w x 2" d

### Is a base included with your sculpture?&nbsp;

yes

### If there's a base, what are the dimensions for the sculpture with the base (width x height x depth)? What's the weight in pounds?

The piece can be affixed to a concrete pad or driven directly into the earth.

### Medium (Note: for mixed media, all materials must be able to withstand Colorado outdoor weather conditions.)

Department of Transportation Specification Street Sign

### Year created

### Artist Statement

As a sculptor, clay is the material I prefer to start my process with but I believe realizing the work in a single medium can be restrictive to my final goal.

To me sculpting is drawing in three dimensional space so I must be flexible to the fluctuations in my creative process. This process most often is born with the manifestation of an idea or image in my mind of some sort which then becomes the starting point for a sculpture.

As the idea and form becomes more definable it starts to take on a meaning and allows me to explore what theme or image has been presented. This procedure is what I go through with each sculpture I create. What they have in common is the process.

### Description

Locks of Love was inspired by a trip to Paris where I came across the Famous Lock bridge. Currently this piece is in Lyons Colorado. The intentions was for viewers to engage the art by adding a lock of their own. That way way the location would leave a mark on them, and they in return would leave a mark on the art...

### Title

Statement Andy Libertone Artist Statement

My sculptures begin with small drawings. These are the maps to ideas I want to explore. The images that come to mind are inspired both by my observation of everyday life and from my lifelong appreciation and study of art and my intense interest in architectural design. My two dimensional drawings are revised so they can be transposed to three dimensional sculptures that are fabricated into steel planes, shapes or solid forms with cutouts. Most works have a see-through quality that amplifies the sense of depth on my pieces. The rhythm and cadence in my work is evidence of my deep interest in music, especially jazz and blues. The orchestration of perforated or solid elements, in mostly vertical constructions are powder-coated and brightly colored.

## Michael Mladjan (Continued)

I am a Colorado artist with 26 years of experience creating sculpture from steel, copper, brass, and aluminum. I have also experimented with wood, clay, bronze, plaster, and cardboard, however my current material is steel.

Most of my sculptures are plants and flowers, and an occasional abstract. All of my larger pieces are for public art or private commissions. The flowers and plants are both realistic or representational, and vary in form, texture, color, and may incorporate found objects. My working life has been devoted to Horticulture and Arboriculture. My sculptures are a representation of my love for nature and are close to my heart. As I continue to grow and develop this energy, I look forward to sharing my work with others.

## seena nayeri (Continued)

I believe evolution of the universe was beginning of true art, since evolution by itself is a "Masterpiece"! All life forms in existence contain a piece of this art, you should only seek it out and nourish it. All life will fade away with the passage of time the fifth ape is a part of this circle of life and therefore subject to its laws. Art amazingly walks a path separate from time and space so it is logical to say it contains the essence of immortality within it. I could not acquire this feeling of being above time and space and mortality anywhere else.

## ELHAM SABRI (Continued)

My main goal in creating these artworks is to depict the unimaginable situation of Iranian women

Women have been overlooked worldwide and at certain times, and my country, Iran, is no exception to this issue. From the camera's perspective, everything looks beautiful, and everyone appears to be at peace, but who knows what is happening in reality?! I am determined to narrate reality to everyone through the artworks I create .

My primary goal is to highlight the situation and position of women in Iran because they are under the government's control in society, and the government even interferes with their optional clothing. Iranian women, who once enjoyed legal rights and freedoms, are now unable even to wear optional clothing. They must undoubtedly wear hijab and dark colored clothes in government offices, and if not, they will face legal consequences. However, when the government wants to use women for its news coverage about elections or news that is beneficial to the

## Jose Trejo-Maya (Continued)

I am a remnant of the Nahuatlacah oral tradition a tonalpouhque mexicana, a commoner from the lowlands (i.e., Mexico) from a time and place that no longer exists. At present my poetry has been reified as it has been published in the UK, US, India, Spain, Australia, Argentina, Germany, and Venezuela. I have been exhibited in different venues with a work that's titled: Transparencies in Time: Cuahpohualli embedded in ethnopoetic language poetry. I seek to expand this work into a comprehensive exhibit in a gallery and/or installation in 3D public art sculptures (i.e., three simultaneous monumental works that expand into multiple levels of perception and/or dimensions). In this the sculptures came from dreams, it's a refraction of our ancestors so you see a mirror in yourself.
